William D. Hobbs, Chairman
The Council for Tobacco Research-U.S.A. Inc.
110 East 59th Street
New York, NY 10022

Dear Sir:

I have recently received a copy of your 1981 report of research activities. The Council is supporting a number of research activities related to our area of interest, protease regulation by the plasma protease inhibitors. I am not familiar with your mechanism of grant application, but I assume there is a form and fixed deadlines. Would it be possible to obtain an application package?

Thank you in advance for your kind consideration of this matter.

Sincerely yours,

Salvatore V. Pizzo, M.D., Ph.D.
Associate Professor of Pathology
Assistant Professor of Biochemistry
